

MULTIPURPOSE GEAR LUBRICANT

BLUE RIBBON Multipurpose Gear Lubricants are formulated with high-quality paraffinic base oil and a premium additive system to provide smooth, quiet performance with maximum protection against wear in gear applications.

FEATURES & BENEFITS:

BLUE RIBBON Multipurpose Gear Lubricants provide superior thermal stability and minimize oxidative sludge and varnish formations in the most severe operating conditions. Highly effective anti-wear agents offer maximum protection against scuffing and wear, and also offer excellent load carrying capacity. Additionally, these products offer the following benefits:

- Non-corrosive properties
- Good resistance to foaming
- Outstanding rust and corrosion protection
- Excellent performance in low ambient temperatures

APPLICATIONS:

BLUE RIBBON Multipurpose Gear Lubricants meet the requirements of most manufacturers for differentials and manual transmissions. They are the right lubricant for conventional differentials in passenger cars, light-duty and heavy-duty trucks, and manual transmissions requiring GL-5 gear oil. These products are recommended for MIL-PRF-2105E, Mack GO-H and GO-J, API Service GL-5 and MT-1, Navistar B-22, and Meritor Automotive, Inc. (formerly Rockwell International) O-76-A and O-76-D.

SELECTION:

BLUE RIBBON Multipurpose Gear Lubricants are available in two viscosity grades, **80W-90** and **85W-140**, as noted in the chart on the backside. Follow equipment manufacturer recommendations for appropriate viscosity grade.

AVAILABILITY:

BLUE RIBBON Multipurpose Gear Lubricants is available throughout Blue Ribbon marketing area. Your Blue Ribbon representative can provide specific information. Call Deckman Oil Co. @ 1.800.836.0562
