

BLUE RIBBON BRAND

Since 1975, Deckman Oil has produced our own line of motor oils, hydraulic oil, heavy-duty engine oils, automatic transmission and universal tractor

fluids, which we market under the Blue Ribbon brand name.

Developed with today's high-speed, high-performance engines that demand high-quality lubricants in mind, our premium Blue Ribbon product line offers protection over a wide range of ambient temperatures.

Blue Ribbon heavy-duty engine oils are produced from base oil technology using state-of-the-art additive chemistries. The resulting products provide maximum engine protection in severe operating conditions, as well as extended drain intervals.

Anti-wear hydraulic products

These premium quality oils provide outstanding thermal stability and are designed for use in high-pressure, high-speed hydraulic pumps with industrial, mobile and marine hydraulic applications.

Tractor fluids

Construction and farming industries utilize our quality tractor fluids, formulated from high-quality paraffin based oils and additives. Designed for superior low-temperature performance, these products possess excellent friction control and are

ideal for use in wet brakes and clutch applications. We've also engineered these lubricants to provide optimum protection from rust and corrosion.

Automatic transmission fluid

Our Blue Ribbon automatic transmission fluid has been designed for the new generation of electronic controlled transmissions. It meets all the performance requirements for current hydraulic manufacturers for anti-wear hydraulic fluids as well as previous transmissions built by GM, Ford, Chrysler and most foreign manufacturers.

Be sure to ask for our Blue Ribbon brand of lubricants. They'll provide maximum protection for your equipment – over a wide range of operating conditions and at a price that doesn't max out your maintenance budget.
